## SKILLS

Javascript(ES6+)

Typescript

React.js

React-native

Material-ui

TailwindCSS

Node.js

Express.js

PostgreSQL

MongoDB

Websocket

WebRTC

Git and Git version control

AI LLM tools like claude code and cursor

Data structure and Algorithm

## HOBBIES

■ Open-source contributor

■ Tech blogger

## SUMMARY

**Full-Stack JavaScript Developer** with strong experience designing, building, and optimizing scalable software solutions. Highly skilled in troubleshooting complex technical issues, proficient with modern JavaScript tools and frameworks, and known as a strong communicator and collaborative team player with a user-focused mindset.

## EXPERIENCE

July 2020 - Current

**Full Stack Javascript Developer Captivator Technologies inc** | Limbe, Cameroon

- Lead developer on multiple high-impact projects, contributing to 35% increase in company revenue
- Designed and built scalable full-stack applications using **Node.js, Express.js, React.js, React Native, MongoDB, and PostgreSQL**
- Collaborated with cross-functional teams to translate business requirements into technical solutions across the full project lifecycle
- Implement CI/CD pipelines for automatic code deployment using Git Actions
- Optimized and refactored codebases to improve performance and maintainability
- Mentored junior developers, conducted code reviews, and recruited talented engineers from Limbe and nearby cities

## PROJECTS

**Nawafra Real Estate (Web Application and mobile)**, Captivator technologies inc, <https://nawafra.com>

Developed a property management and listing platform connecting landlords with tenants and buyers across Africa. Contributed to both frontend and backend development using React.js and Node.js, built RESTful APIs, implemented real-time communication with WebSockets, integrated Google Maps for location-based property search, and used PostgreSQL for data management to enhance property discovery and management efficiency.

**School Work Bench (Web Application and Mobile Application)**

<https://app.dev.schoolbench.pro>

Developed a cloud-based school management system that centralizes student records, attendance, grades, scheduling, payments, and communication in a single platform. The system streamlines administrative and academic workflows, improves data accuracy, and enables efficient interaction between administrators, teachers, students, and parents through a secure, responsive web interface.

## EDUCATION

**Learned React, Node and React native**

Mar 2017 - May 2020

CodeWithMosh - Online Software Development Training, USA

Completed hands-on online training at **CodeWithMosh** ([codewithmosh.com](https://codewithmosh.com)), gaining practical experience in **React, React Native, Node.js, and MongoDB**, with a strong focus on building real-world web and mobile applications, modern JavaScript practices, and full-stack development fundamentals.
